DEPARTMENT OF LABOR

Office of the Secretary

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Automatic Fire Sensor and Warning Devices Systems; Examination and Test Requirements

ACTION: Notice.

SUMMARY: The Department of Labor (DOL) is submitting the Mine Safety and Health Administration (MSHA) sponsored information collection request (ICR) titled, “Automatic Fire Sensor and Warning Devices Systems,” to the Office of Management and Budget (OMB) for review and approval for continued use in accordance with the Paperwork Reduction Act of 1995 (Pub. L. 104-13, 44 U.S.C. chapter 35).

DATES: Submit comments on or before [INSERT DATE 30 DAYS AFTER THE DATE OF PUBLICATION IN THE FEDERAL REGISTER].

ADDRESSES: A copy of this ICR with applicable supporting documentation; including a description of the likely respondents, proposed frequency of response, and estimated total burden may be obtained from the RegInfo.gov Web site, <http://www.reginfo.gov/public/do/PRAMain>, on the day following publication of this notice or by contacting Michel Smyth by telephone at 202-693-4129 (this is not a toll-free number) or sending an email to DOL_PRA_PUBLIC@dol.gov.

Submit comments about this request to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for the Department of Labor, Mine Safety and Health Administration (MSHA), Office of Management and Budget, Room 10235, Washington,

DC 20503, Telephone: 202-395-6929/Fax: 202-395-6881 (these are not toll-free numbers), email: OIRA_submission@omb.eop.gov.

FOR FURTHER INFORMATION: Contact Michel Smyth by telephone at 202-693-4129 (this is not a toll-free number) or by email at DOL_PRA_PUBLIC@dol.gov.

SUPPLEMENTARY INFORMATION: The information collection addressed by this notice is intended by MSHA to help ensure the protection of miners by assuring that automatic fire sensor and warning device systems are maintained and calibrated in order to function properly at all times. Technical advances have made it practicable automatically to detect fires in mines and to warn miners when fires are detected. When these systems function as designed, they can prevent fatal or serious injuries to miners when a fire occurs. The MSHA requires mine operators to record tests to ensure they function and to calibrate the systems, ensuring they operate reliably and warn miners of the presence of fires.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information if the collection of information does not display a valid OMB control number. See 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under OMB Control Number 1219-0145. The current OMB approval is scheduled to expire on January 31, 2012; however, it should be noted that information collections submitted to

the OMB receive a month-to-month extension while they undergo review. For additional information, see the related notice published in the Federal Register on September 20, 2011 (76 FR 58301).

Interested parties are encouraged to send comments to the OMB, Office of Information and Regulatory Affairs at the address shown in the ADDRESSES section within 30 days of publication of this notice in the Federal Register. In order to help ensure appropriate consideration, comments should reference OMB Control Number 1219-0145. The OMB is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
 - Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
 - Enhance the quality, utility, and clarity of the information to be collected;
- and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Agency: Mine Safety and Health Administration (MSHA).

Title of Collection: Automatic Fire Sensor and Warning Devices Systems.

OMB Control Number: 1219-0145.

Affected Public: Private Sector—Businesses or other for-profits.

Total Estimated Number of Respondents: 554.

Total Estimated Number of Responses: 146,096.

Total Estimated Annual Burden Hours: 2,518.

Total Estimated Annual Costs Burden: \$3,477.

Date: January 26, 2012.

Michel Smyth,

Departmental Clearance Officer.

BILLING CODE: 4510-43-P
