SUPPLEMENTARY INFORMATION:

Background

On December 10, 2010, NMFS made a 12-month petition finding and proposed to list the Arctic (Phoca hispida hispida), Baltic (Phoca hispida botnica), Okhotsk (Phoca hispida ochotensis), and Ladoga (Phoca hispida ladogensis) subspecies of ringed seals as threatened (75 FR 77476). On December 13, 2011, in consideration of substantial disagreement regarding the sufficiency or accuracy of the model projections and analysis of future sea ice habitat, in particular snow cover, for Arctic ringed seals, NMFS announced a 6-month extension of the deadline for the final listing determination to June 10, 2012 (FR 77466). At that time, we also announced that we were conducting special independent peer review of the sections of the status review report of the ringed seal (Kelly et al., 2010) related to the disagreement, and that the resulting peer review report would be made available for public comment.

We have conducted this special peer review, and are notifying the public of the availability of a peer review report that consolidates the comments received. We are also providing the public an opportunity to submit comments or information on the peer review report for 30 days. The comment period shall be limited to 30 days because the statutory deadline requires a final listing determination by June 10, 2012.
