

information collected will aid those subject to Rule 204 in complying with its requirements. These collections of information are mandatory.

Several provisions under Rule 204 will impose a “collection of information” within the meaning of the Paperwork Reduction Act.

- I. Allocation Notification Requirement: As of December 31, 2011, there were 4,695 registered broker-dealers. Each of these broker-dealers could clear trades through a participant of a registered clearing agency and, therefore, become subject to the notification requirements of Rule 204(d). If a broker-dealer has been allocated a portion of a fail to deliver position in an equity security and after the beginning of regular trading hours on the applicable close-out date, the broker-dealer has to determine whether or not that portion of the fail to deliver position was not closed out in accordance with Rule 204(a), we estimate that a broker-dealer will have to make such determination with respect to approximately 2.09 equity securities per day.¹ We estimate a total of 2,472,762 notifications in accordance with Rule 204(d) across all broker-dealers (that were allocated responsibility to close out a fail to deliver position) per year (4,695 broker-dealers notifying participants once per day² on 2.09 securities, multiplied by 252 trading

¹ As stated in the adopting release for Interim Final Temporary Rule 204T, the Commission’s Office of Economic Analysis (“OEA”) estimates that there are approximately 9,809 fail to deliver positions per settlement day. Across 4,695 broker-dealers, the number of securities per broker-dealer per day is approximately 2.09 equity securities. During the period from January to July 2008, approximately 4,321 new fail to deliver positions occurred per day. The National Securities Clearing Corporation (“NSCC”) data for this period includes only securities with at least 10,000 shares in fails to deliver. To account for securities with fails to deliver below 10,000 shares, the figure is multiplied by a factor of 2.27. The factor is estimated from a more complete data set obtained from NSCC during the period from September 16, 2008 to September 22, 2008. It should be noted that these numbers include securities that were not subject to the close-out requirement of Rule 203(b)(3) of Regulation SHO. Exchange Act Release No. 58733 (Oct. 14, 2008), 73 FR 61706, 61718 n.107 (Oct. 17, 2008) (“Rule 204T Adopting Release”).

² Because failure to comply with the close-out requirements of Rule 204(a) is a violation of the rule, we believe that a broker-dealer would make the notification to a participant that it is subject to the borrowing requirements of Rule 204(b) at most once per day.

days in a year). The total estimated annual burden hours per year will be approximately 395,642 burden hours (2,472,762 multiplied by 0.16 hours/notification).

- II. Demonstration Requirement for Fails to Deliver on Long Sales: As of January 31, 2012, there were 191 participants of NSCC, the primary registered clearing agency responsible for clearing U.S. transactions that were registered as broker-dealers.³ If a participant of a registered clearing agency has a fail to deliver position in an equity security at a registered clearing agency and determines that such fail to deliver position resulted from a long sale, we estimate that a participant of a registered clearing agency will have to make such determination with respect to approximately 35 securities per day.⁴ We estimate a total of 1,684,620 demonstrations in accordance with Rule 204(a)(1) across all participants per year (191 participants checking for compliance once per day on 35 securities, multiplied by 252 trading days in a year). The total approximate estimated annual burden hour per year will be approximately 269,540 burden hours (1,684,620 multiplied by 0.16 hours/documentation).
- III. Pre-Borrow Notification Requirement: As of January 31, 2012, there were 191 participants of NSCC, the primary registered clearing agency responsible for clearing

³ Those participants not registered as broker-dealers include such entities as banks, U.S.-registered exchanges, and clearing agencies. Although these entities are participants of a registered clearing agency, generally these entities do not engage in the types of activities that will implicate the close-out requirements of the rule. Such activities of these entities include creating and redeeming Exchange Traded Funds, trading in municipal securities, and using NSCC's Envelope Settlement Service or Inter-city Envelope Settlement Service. These activities rarely lead to fails to deliver and, if fails to deliver do occur, they are small in number and are usually closed out within a day.

⁴ OEA estimates approximately 68% of trades are long sales and applies this percentage to the number of fail to deliver positions per day. OEA estimates that there are approximately 9,809 fail to deliver positions per settlement day. Across 191 broker-dealer participants of the NSCC, the number of securities per participant per day is approximately 51 equity securities. 68% of 51 securities per day is approximately 35 securities per day. The 68% figure is estimated as 100% minus the proportion of short sale trades found in the Regulation SHO Pilot Study. See <http://www.sec.gov/news/studies/2007/regshopilot020607.pdf>.

U.S. transactions that were registered as broker-dealers.⁵ If a participant of a registered clearing agency has a fail to deliver position in an equity security and after the beginning of regular trading hours on the applicable close-out date, the participant has to determine whether or not the fail to deliver position was closed out in accordance with Rule 204(a), we estimate that a participant of a registered clearing agency will have to make such determination with respect to approximately 51 equity securities per day.⁶ We estimate a total of 2,454,732 notifications in accordance with Rule 204(c) across all participants per year (191 participants notifying broker-dealers once per day on 51 securities, multiplied by 252 trading days in a year). The total estimated annual burden hours per year will be approximately 392,758 burden hours (2,454,732 @ 0.16 hours/documentation).

IV. Certification Requirement: If the broker-dealer determines that it has not incurred a fail to deliver position on settlement date in an equity security for which the participant has a fail to deliver position at a registered clearing agency or has purchased securities in accordance with the conditions specified in Rule 204(e), we estimate that a broker-dealer will have to make such determinations with respect to approximately 2.09 securities per day. As of December 31, 2011, there were 4,695 registered broker-dealers. Each of these broker-dealers may clear trades through a participant of a registered clearing agency. We estimate that on average, a broker-dealer will have to certify to the participant that it has not incurred a fail to deliver position on settlement date in an equity security for which the participant has a fail to deliver position at a registered clearing

⁵ See *supra* note 3.

⁶ OEA estimates that there are approximately 9,809 fail to deliver positions per day. Across 191 broker-dealer participants of the NSCC, the number of securities per participant per day is approximately 51 equity securities. During the period from January to July 2008, approximately 4,321 new fail to deliver positions occurred per day. The NSCC data for this period includes only securities with at least 10,000 shares in fails to deliver. To account for securities with fails to deliver below 10,000 shares, the figure is grossed-up by a factor of 2.27. The factor is estimated from a more complete data set obtained from NSCC during the period from September 16, 2008 to September 22, 2008. It should be noted that these numbers include securities that were not subject to the close-out requirement of Rule 203(b)(3) of Regulation SHO.

agency or, alternatively, that it is in compliance with the requirements set forth in Rule 204(e), 2,472,762 times per year (4,695 broker-dealers certifying once per day on 2.09 securities, multiplied by 252 trading days in a year). The total approximate estimated annual burden hour per year will be approximately 395,642 burden hours (2,472,762 multiplied by 0.16 hours/certification).

- V. Pre-Fail Credit Demonstration Requirement: If a broker-dealer purchases or borrows securities in accordance with the conditions specified in Rule 204(e) and determines that it has a net long position or net flat position on the settlement day on which the broker-dealer purchases or borrows securities we estimate that a broker-dealer will have to make such determination with respect to approximately 2.09 securities per day.⁷ As of December 31, 2011, there were 4,695 registered broker-dealers. We estimate that on average, a broker-dealer will have to demonstrate in its books and records that it has a net long position or net flat position on the settlement day for which the broker-dealer is claiming credit, 2,472,762 times per year (4,695 broker-dealers checking for compliance once per day on 2.09 securities, multiplied by 252 trading days in a year). The total approximate estimated annual burden hour per year will be approximately 395,642 burden hours (2,472,762 multiplied by 0.16 hours/demonstration).

The total aggregate annual burden for the collection of information undertaken pursuant to all five provisions is thus 1,849,224 hours per year (395,642 + 269,540 + 392,758 + 395,642 + 395,642).

The Commission may not conduct or sponsor a collection of information unless it displays a currently valid OMB control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.
