**SUPPLEMENTARY INFORMATION:**

**I. Abstract**

This request is for a new information collection to benefit local fishery managers in the U.S. Virgin Islands (USVI). Non-commercial fishing is an important activity on St. Croix, USVI yet robust data characterizing the catch, effort and cultural attributes of such fishing are limited. Without these basic data on the non-commercial fishery on St. Croix, it is not possible to develop required fishery management plans. Consequently, local fishery managers have asked for collection of information required to make management decisions, information that will help them to balance the need for more effective fishery management with social, economic and cultural imperatives of the region.

Researchers propose to conduct two distinct data collection efforts, Collection A and Collection B. Collection A will consist of a survey of non-commercial, shore-based fishers. This survey will ascertain the catch, effort, and socioeconomic characteristics of fishers using this mode of fishing on St. Croix. Collection B will be a survey of boat-based, non-commercial fishers on St. Croix to document levels of catch and effort for this mode of fishing.

The data gathered will be used to describe recreational and subsistence sectors in St. Croix, and evaluate the socio-economic impacts of federal regulatory actions. In addition, the information will be used to strengthen and improve fishery

management decision-making, satisfy legal mandates under Executive Order 12866, the Magnuson Stevens Fishery Conservation and Management Act (U.S.C. 1801 et seq.), the Regulatory Flexibility Act, the Endangered Species Act, and the National Environmental Policy Act, and other pertinent statutes.

## **II. Method of Collection**

Collection A, which will take place over a 12-month period, will be comprised of two data collection activities: 1) a survey of shore-based fishers, and 2) counts of shore-based fishers. Collection B, which will take place over a 24-month period, will include two data collection activities: 1) a survey of fishers at boat ramps and, 2) a count of boat trailers or vehicles at launch sites where surveys are administered.
