## **II Further Information**

The NRC seeks public comment on a proposed a new section of the SRP Section 13.6.4, "Access Authorization - Operational Program," (ADAMS Accession No. ML12125A098). This section has been developed to assist NRC staff with the review of applications for certain construction permits, early site permits, licenses, license amendments, and combined licenses and to inform new reactor applicants and other affected entities of proposed SRP guidance regarding an acceptable method by which to evaluate a proposed access authorization program for compliance with 10 CFR Part 26, 10 CFR 73.56 and 73.57. Following NRC staff evaluation of public comments, the NRC intends to incorporate the final approved guidance into the next

revision of NUREG-0800. The SRP is guidance for the NRC staff. The SRP is not a substitute for the NRC regulations, and compliance with the SRP is not required. Accordingly, issuance of the SRP does not constitute “backfitting” as defined in 10 CFR 50.109(a)(1) of the Backfit Rule and is not otherwise inconsistent with the applicable issue finality provisions in 10 CFR Part 52.

Dated at Rockville, Maryland, this 21st day of December 2012.
