Title: NSPS for Coal Preparation and Processing Plants (Renewal)

ICR Numbers: EPA ICR Number 1062.13, OMB Control Number 2060-0122

ICR Status: This ICR is scheduled to expire on February 28, 2013. Under OMB regulations, the Agency may continue to either conduct or sponsor the collection of information while this submission is pending at OMB.

Abstract: The affected entities are subject to the General Provisions of the NSPS at 40 CFR part 60, subpart A and any changes, or additions to the Provisions specified at 40 CFR part 60, subpart Y. Owners or operators of the affected facilities must make an initial notification report, performance tests, periodic reports, and maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports are also required semiannually.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 19 hours per response. “Burden” means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the

collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Coal preparation and processing plants

Estimated Number of Respondents: 1,037

Frequency of Response: Initially, semiannual, and annually

Estimated Total Annual Hour Burden: 41,998

Estimated Total Annual Cost: \$4,414,741, which includes \$4,066,701 in labor costs, \$282,400 in capital/startup costs, and \$65,640 in operation and maintenance (O&M) costs.

Changes in the Estimates: There is an adjustment increase in the total estimated burden as currently identified in the OMB Inventory of Approved Burdens. This increase is not due to any program changes. The change in the burden and cost estimates occurred because the most recent ICR reflects burdens associated with the final rule amendment, which only applies to sources constructed, reconstructed, or modified on or after April 28, 2008 (i.e. new sources). This ICR estimates the burdens for both existing sources subject to the standard and new sources covered under the rule amendment. Additionally, this ICR uses updated labor rates to calculate all burden costs. This method resulted in an increase of labor hours and costs for both the respondents and the Agency.

There is an adjustment decrease in capital/startup costs in this ICR as compared to the previous ICR. The decrease occurred because the previous ICR assumes all new sources were constructed during Year 1 of the three-year period, and that all capital/startup costs for new sources were incurred that year. This ICR assumes a constant growth rate in the respondent universe over the three-year period and calculates the average capital/startup costs per year.

Additionally, there is an increase in the total O&M costs. The increase is due to a growth

in the respondent universe subject to on-going O&M costs since the last ICR.

John Moses, Director, Collection Strategies Division.
