SUPPLEMENTARY INFORMATION:

Discussion

The NRC received an application, dated April 23, 2007, from Entergy Nuclear Operations, Inc. (Entergy), filed pursuant to Section 103 of the Atomic Energy Act of 1954, as amended, and Title 10 of the *Code of Federal Regulations*, Part 54 (10 CFR Part 54), to renew the operating license for IP2 and IP3. Renewal of the license would authorize the applicant to operate the facilities for an additional 20-year period beyond the period specified in the current operating licenses. The current operating license for IP2 expires on September 28, 2013, and the current operating license for IP3 expires on December 12, 2015.

This supplement (Volume 4) to the FSEIS is being issued as part of the NRC's process to decide whether to issue a renewed license to IP2 and IP3, pursuant to 10 CFR Part 54. This supplement to the FSEIS was prepared in compliance with the National Environmental Policy Act of 1969, as amended (NEPA), and the NRC's regulations for implementing NEPA in 10 CFR Part 51.

In December 2010, the NRC published its FSEIS related to the license renewal of IP2 and IP3, NUREG-1437, Supplement 38, Volumes 1-3. After publication, the staff identified new information that necessitated changes to its assessments in the FSEIS. In addition to supplementing the FSEIS to address the new information, the NRC is also documenting the completion of the consultation process under Section 7 of the Endangered Species Act of 1973, as amended (ESA), with the National Marine Fisheries Service (NMFS) regarding the shortnose sturgeon (*Acipenser brevirostrum*) and the Atlantic sturgeon (*Acipenser oxyrinchus oxyrinchus*) population in the vicinity of IP and IP3. This supplement to the FSEIS does not alter the conclusion stated in Section 9.3 of the December 2010 FSEIS:

Based on (1) the analysis and findings in the GEIS, (2) the ER and other information submitted by Entergy, (3) consultation with Federal, State, Tribal, and local agencies, (4) the NRC staff's consideration of public scoping comments received, and comments on the draft SEIS, and (5) the NRC staff's independent review, the recommendation of the NRC staff is that the Commission determine that the adverse environmental impacts of license renewal for IP2 and IP3 are not so great that preserving the option of license renewal for energy planning decision makers would be unreasonable.

In preparing this supplement (Volume 4) to the final SEIS, the NRC staff also reviewed, considered, evaluated, and addressed the public comments received during the comment process on the draft supplement to the final SEIS.
