SUPPLEMENTARY INFORMATION:

Title: Importation of Fresh Pomegranates From Chile.

OMB Number: 0579-0375.

Type of Request: Extension of approval of an information collection.

Abstract: The Plant Protection Act (PPA, 7 U.S.C. 7701 et seq.) authorizes the Secretary of Agriculture to restrict the importation, entry, or interstate movement of plants, plant products, and other articles to prevent the introduction of plant pests into the United States or their dissemination within the United States. As authorized by the PPA, the Animal and Plant Health Inspection Service (APHIS) regulates the importation of certain fruits and vegetables in accordance with the regulations in “Subpart—Fruits and Vegetables” (7 CFR 319.56-1 through 319.56-59).

Under these regulations, fresh pomegranates from Chile may be imported into the continental United States under certain conditions, as listed in 7 CFR 319.56-56, to prevent the introduction of plant pests into the United States. The regulations require information collection

activities, including production site registration, list of certified production sites, labeling of containers with the registered production site identified, and a phytosanitary certificate with an additional declaration.

Since the last approval, we have decreased the estimated number of respondents from 7 to 3, and we have also decreased the estimated total annual burden on respondents from 158 hours to 150 hours. We decreased these numbers because we discovered duplications in our calculations.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

- (1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;
- (2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
- (3) Enhance the quality, utility, and clarity of the information to be collected; and
- (4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; e.g., permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 0.5263 hours per response.

Respondents: Fresh pomegranates production sites, packinghouses, importers of fresh pomegranates from Chile, and the national plant protection organization of Chile.

Estimated annual number of respondents: 3.

Estimated annual number of responses per respondent: 95.

Estimated annual number of responses: 285.

Estimated total annual burden on respondents: 150 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 19th day of September 2013 .

Michael C. Gregoire,

Acting Administrator, Animal and Plant Health Inspection Service.
