**SUPPLEMENTARY INFORMATION:**

**I. Background**

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (i.e., employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accord with the Paperwork Reduction Act of 1995 (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (the OSH Act) (29 U.S.C. 651 et seq.) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

The basic purpose of the information collection requirements in the Standard on Ionizing Radiation is to document that employers are providing their workers with protection from hazardous ionizing radiation exposure.

Several provisions of the Standard specify paperwork requirements, including: monitoring worker exposure to ionizing radiation, instructing workers on the hazards associated with ionizing radiation exposure and precautions to minimize exposure, posting of caution signs at radiation areas, reporting worker overexposures to OSHA, maintaining exposure records, and providing exposure records to current and former workers.

## **II. Special Issues for Comment**

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the Agency's functions to protect workers, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

### III. Proposed Actions

OSHA is requesting that OMB extend its approval of the information collection requirements specified in the Ionizing Radiation Standard. OSHA is also requesting that it retain its current burden hour estimate of 45,217 hours. There is no adjustment in the estimated total of \$5,691,144 for the cost for whole body monitoring and extremity monitoring badges. The Agency will summarize the comments submitted in response to this notice, and will include this summary in the request to OMB.
