**SUMMARY:** The Maritime Administration (MARAD) has prepared a draft Programmatic Environmental Assessment (PEA) in compliance with the National Environmental Policy Act of 1969 to evaluate potential environmental impacts associated with the execution of the "America's Marine Highway" Program. The draft PEA identifies and assesses hypothetical scenarios associated with the operation of potential Marine Highway services in five distinct regions throughout the continental United States. Once finalized, the PEA will serve as a guidance document from which future site specific NEPA analyses can be initiated.

**SUPPLEMENTARY INFORMATION:** The Energy Independence and Security Act of 2007 (2007 Energy Act) directed the Secretary of Transportation to establish a "short sea" transportation program, and to designate short sea transportation routes and projects to be conducted under the program, for the purpose of mitigating landside congestion. Pursuant to the statutory mandate, in 2010, MARAD established the "America's Marine Highway" Program (the Program), designating criteria, eligibility requirements and information for applicants seeking to establish America's Marine Highway (AMH) routes and projects. Projects designated under the program must use U.S. documented vessels, transport passengers or freight (in containers or trailers) and must operate on a designated Marine Highway route. Section 405 of the Coast Guard and Maritime Transportation Act of 2012 expanded the geographic scope of the program to include routes between all U.S. ports, including U.S. ports with no contiguous landside connection, as well as routes between U.S. ports and ports in Canada located in the Great Lakes Saint Lawrence Seaway System. The Act also added the purpose of promoting the use of short sea transportation.

The Program itself does not develop or operate Marine Highway services. Rather, the program provides a set of tools for use by ports, state and local governments, and private industry to consider expansion of AMH services. Where such designations are made, MARAD may encourage development of particular AMH projects or services when funding is available.

MARAD has prepared a programmatic environmental assessment (PEA) to analyze the potential environmental impacts of performance of the AMH program. As a programmatic document, the PEA does not analyze the environmental impacts of specific AMH route or project designations or the establishment of specific AMH services. Such analyses can only be done in the context of specific proposals, with known ports, infrastructure, natural environments, transportation

volumes, etc. MARAD envisions that additional environmental analyses of the federal aspects of future project and service development along designated AMH routes will be necessary. Those future analyses may use this PEA as a starting point, to analyze the specific environmental impacts of each particular proposal.
