Delisting–American Peregrine Falcon**

**AGENCY:** Fish and Wildlife Service, Interior.

**ACTION:** Notice; request for comments.

**SUMMARY:** We (U.S. Fish and Wildlife Service) will ask the Office of Management and Budget (OMB) to approve the information collection (IC) described below. As required by the Paperwork Reduction Act of 1995 and as part of our continuing efforts to reduce paperwork and respondent burden, we invite the general public and other Federal agencies to take this opportunity to comment on this IC. This IC is scheduled to expire on September 30, 2014. We may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

**DATES:** To ensure that we are able to consider your comments on this IC, we must receive them by **[INSERT DATE 60 DAYS AFTER DATE OF PUBLICATION IN THE FEDERAL REGISTER]**.

**ADDRESSES:** Send your comments on the IC to the Service Information Collection Clearance Officer, U.S. Fish and Wildlife Service, MS 2042–PDM, 4401 North

**SUPPLEMENTARY INFORMATION:**

**I. Abstract.** This information collection implements requirements of the Endangered Species Act (16 U.S.C. 1531 et seq.) (ESA). There are no corresponding Service regulations for the ESA post–delisting monitoring requirement. This IC also implements the Migratory Bird Treaty Act (16 U.S.C. 704) and Service regulations in chapter I, subchapter B of title 50 of the Code of Federal Regulations (CFR).

The American peregrine falcon was removed from the List of Endangered and Threatened Wildlife on August 25, 1999 (64 FR 46542). Section 4(g) of the ESA requires that all species that are recovered and removed from the List of Endangered and Threatened Wildlife (delisted) be monitored in cooperation with the States for a period of not less than 5 years. The purpose of this requirement is to detect any failure of a recovered species to sustain itself without the protections of the ESA. We work with relevant State agencies and other species experts to develop appropriate plans and procedures for systematically monitoring recovered wildlife and plants.

The American peregrine falcon has a large geographic distribution that includes a substantial amount of non-Federal land. Although the ESA requires that monitoring of recovered species be conducted for not less than 5 years, the life history of American peregrine falcons is such that it is appropriate to monitor this species for a longer period of time in order to meaningfully evaluate whether or not the recovered species continues to maintain its recovered status. The Monitoring Plan for the American Peregrine Falcon is available on our website at <http://www.fws.gov/endangered/esa-library/pdf/Peregrineplan2003.pdf>. Formal collection of monitoring data commenced in 2003 and will continue through 2015.

We will use the information supplied on FWS Forms 3-2307, 3-2308, and 3-2309 to review the status of the American peregrine falcon in the United States and determine if it remains recovered and, therefore, does not require the protections of the ESA:

(1) FWS Form 3-2307 (Peregrine Falcon Monitoring Form) addresses the reporting requirements to record observations on the nesting pair, and the numbers of eggs and young during each nest visit. Each territory will be visited at least two times.

(2) FWS Form 3-2308 (Peregrine Falcon Egg Contaminants Data Sheet) addresses the reporting requirements to record data on eggs collected opportunistically during a nest visit.

(3) FWS Form 3-2309 (Peregrine Falcon Feather Contaminants Data Sheet) addresses the reporting requirements to record data on feathers collected opportunistically during a nest visit. Once collected, the eggs and feathers are archived in a deep freeze for analysis at a later time.
