Quartz Valley Indian Community of the Quartz Valley Reservation of California; Shoshone Tribe of the Wind River Reservation, Wyoming; and the Shoshone-Bannock Tribes of the Fort Hall Reservation.

### **History and description of the remains**

In 1986, human remains representing, at minimum, two individuals, were delivered to the offices of the U.S. Army Corps of Engineers, Walla Walla District, by an unknown individual. Notes with the collection stated that one set of human remains had been removed from the Klamath Lake area in Oregon and the other from western Montana. It is not known which set of human remains was from which area. In 2001, the human remains were turned over to the Museum of Anthropology at Washington State University. No known individuals were identified. The two associated funerary objects include 1 metal cup and 1 lot of fabric. Cultural affiliation for these remains was based primarily on the geographical locations of removal. In addition, the character of the associated funerary objects is very similar to funerary objects often associated with historic Native American burials in the interior northwest.

### **Determinations made by the Museum of Anthropology at Washington State University.**

Officials of the Museum of Anthropology at Washington State University have determined that:

- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice represent the physical remains of 2 individuals of Native American ancestry.
