Yedatene Na, LLC

Project No. 14646-000

NOTICE OF PRELIMINARY PERMIT APPLICATION ACCEPTED FOR FILING
AND SOLICITING COMMENTS, MOTIONS TO INTERVENE, AND
COMPETING APPLICATIONS

On November 6, 2014, Yedatene Na, LLC filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of the Jack River Dam Hydroelectric Project (Jack River Project or project) to be located on the Jack River, near Cantwell in Matanuska-Susitna Borough, Alaska. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission. The project reservoir utilizes 286 acres of land owned by the Bureau of Land Management.

The proposed project would consist of the following: (1) a 750-foot-long, 250-foot-high dam on the Jack River with a 250-foot-high spillway built into the crest of the dam; (2) an 865-acre reservoir with a storage capacity of 50,700-acre-feet; (3) two 300-foot-long, 4-foot-diameter steel penstocks; (4) a 75-foot long, 125-foot-wide powerhouse with two Francis turbine units rated for 2.1 megawatts (MW) each or 4.2 MW total at 250 feet of net head; (5) a 20-foot-wide, 20-foot-deep, 25-foot-long concrete tailrace emptying into the Jack River; (6) an 8,000-foot-long, 15-kilovolt transmission line tying into the existing substation northwest of the project; and (7) appurtenant facilities.

The estimated annual generation of the Jack River Project would be 23.4 gigawatt-hours.
