k. Description of Request: The licensee requests a modification of its previous March 25, 2015 request for temporary flow variance, which is currently pending before the Commission. Specifically, the licensee requests an expanded temporary flow variance at the South Fork American River below Kyburz location, such that flows are reduced: from required 60 cubic feet per second (cfs) to 45 cfs from May 1-15; from the required 60 cfs to 30 cfs from May 16-31; from the required 60 cfs to 18 cfs in June; from the required 40 cfs to 15 cfs in July; and from the required 18 cfs to 15 cfs in August.

The licensee states that the revised request is in response to worsening drought conditions in the project area, including record low snowpack and accelerated spring runoff that has occurred this year. The licensee also states that it maintains its previous request for temporary flow variances in Caples Creek, Echo Creek, Silver Fork American River and Pyramid Creek.
