[Project No. 14654-000]

Twain Resources, LLC;

Notice Of Preliminary Permit Application Accepted For Filing And Soliciting
Comments, Motions To Intervene, And Competing Applications

On December 12, 2014, Twain Resources, LLC, filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of the Tungstar Redux Water Power Project (Tungstar Redux Project or project) to be located at Pine Creek Mine and along Morgan and Pine Creek, near the City of Bishop in Inyo County, California. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project would consist of the following: (1) an intake of an unspecified design collecting Pine Creek Mine discharge water from its discharge point on Morgan Creek; (2) an 18-inch-diameter steel penstock of unspecified length with a 450-foot vertical drop; (3) a powerhouse; (4) a 600-kW impulse turbine connected to a 625-kVA generator; (5) a transmission line; (6) a substation connecting to an existing 56-kV main transmission line, and (7) appurtenant facilities. The estimated annual generation of the Tungstar Redux Project would be 3,600 megawatt-hours.

Applicant Contact: Mr. Doug Hicks, Twain Resources, LLC, 280 Florenca Way, Reno, Nevada 89511; phone: (775) 997-3429.
