SUPPLEMENTARY INFORMATION:

Background

The draft RIA evaluates the economic and social costs and benefits of the proposed stream protection rule and its alternatives. The draft RIA was developed in accordance with Executive Order 12866 – Regulatory Planning and Review, as modified by Executive Order 13563.

Significant advances in scientific knowledge and mining and reclamation techniques have occurred in the more than 30 years that have elapsed since the enactment of the Surface Mining Control and Reclamation Act of 1977, 30 U.S.C. 1201 et seq., and the adoption of federal regulations implementing that law. The primary purpose of the proposed stream protection rule is to update our regulations and provide regulatory certainty to industry using advances in scientific knowledge to minimize the adverse impacts of surface coal mining operations on surface water, groundwater, fish, wildlife, and related environmental values, with particular emphasis on protecting or restoring streams and aquatic ecosystems.
