**.APPENDIX: QUESTIONS TO ADDRESS**

- How should segments be defined for purposes of disaggregation?
- Are there scenarios in which pipelines should be required to file disaggregated information and scenarios in which they should not? List specific scenarios.
- What would be the additional cost to report disaggregated information on the Form 6 page 700?
- What are the potential benefits of requiring disaggregated information?
- Do pipelines currently track their revenues and operating expenses by segment?
- If pipelines are required to provide cost information by segments, should they also be required to provide volumes and revenues by segments?
- What allocation methods do pipelines use to determine the share of overhead and shared costs associated with each segment? Would this have to change if the information is broken down by segment, and if so, how?
- What, if any, are the drawbacks of the current process of providing workpapers to parties once a proceeding has been initiated?
- In addition to shippers, which “interested persons” should be entitled to request workpapers?
- How frequently should shippers and other interested persons be entitled to access workpapers?
- Do workpapers need to be provided in electronic form to be useful? Should the Commission standardize the manner in which workpapers are presented?
- What process and protections should be required in connection with making workpapers available on request?
- What additional costs are associated with making workpapers available upon request as compared to the current process of making them available once a trial-type hearing has been initiated?
