Currently, the Mine Safety and

Health Administration (MSHA) is soliciting comments on the information collection for Explosive Materials and Blasting Units (pertains only to metal and nonmetal underground mines deemed to be gassy).

**SUPPLEMENTARY INFORMATION:**

**I. Background**

Under Title 30 U.S. Code of Federal Regulations (30 CFR) Parts 7 and 15, the Mine Safety and Health Administration (MSHA) evaluates and approves explosive materials and blasting units as permissible for use in the mining industry. However, since there are no permissible explosives or blasting units available that have adequate blasting capacity for some metal and nonmetal gassy mines, 30 CFR 57.22606(a) outlines the procedures for mine operators to follow when using nonapproved explosive materials and blasting units. The standard requires mine operators of Class III metal or nonmetal mines to notify MSHA in writing prior to their use of nonapproved explosive materials and blasting units. MSHA then evaluates the non-approved explosive materials and determines whether they are safe for use in a gassy environment.

**II. Desired Focus of Comments**

MSHA is soliciting comments concerning the proposed information collection related to Explosive Materials and Blasting Units (pertains only to metal and nonmetal

underground mines deemed to be gassy). MSHA is particularly interested in comments that:

- Evaluate whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information has practical utility;
- Evaluate the accuracy of MSHA's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
- Suggest methods to enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

The information collection request will be available on <http://www.regulations.gov>. MSHA cautions the commenter against providing any information in the submission that should not be publicly disclosed. Full comments, including personal information provided, will be made available on [www.regulations.gov](http://www.regulations.gov) and [www.reginfo.gov](http://www.reginfo.gov).

The public may also examine publicly available documents at USDOL-Mine Safety and Health Administration, 201 12<sup>th</sup> South, Suite 4E401, Arlington, VA 22202-5452. Sign in at the receptionist's desk on the 4<sup>th</sup> floor via the East elevator.
