**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Proposed rule.

**SUMMARY:** The Environmental Protection Agency (EPA) is proposing to approve revisions to the State Implementation Plan (SIP) submitted by the State of Missouri relating to the Ten Year Limited Maintenance Plan for the St. Louis area for the 8-Hour Carbon Monoxide (CO) National Ambient Air Quality Standard (NAAQS). On April 8, 2014, the Missouri Department of Natural Resources (MDNR) submitted to EPA a second 10-year maintenance plan for the St. Louis area for the CO NAAQS. This maintenance plan addresses maintenance of the CO NAAQS for a second 10-year period beyond the original redesignation. In accordance with the requirements of the Clean Air Act (CAA), EPA is approving

the revision because the State adequately demonstrates that the St. Louis Maintenance area will maintain air quality standards for CO through the year 2022.

**SUPPLEMENTARY INFORMATION:** In the final rules section of the **Federal Register**, EPA is approving the state's SIP revision as a direct final rule without prior proposal because the Agency views this as a noncontroversial revision amendment and anticipates no relevant adverse comments to this action. A

detailed rationale for the approval is set forth in the direct final rule. If no relevant adverse comments are received in response to this action, no further activity is contemplated in relation to this action. If EPA receives relevant adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed action. EPA will not institute a second comment period on this action. Any parties interested in commenting on this action should do so at this time. Please note that if EPA receives adverse comment on part of this rule and if that part can be severed from the remainder of the rule, EPA may adopt as final those parts of the rule that are not the subject of an adverse comment.
