Chlorinated Isocyanurates from Spain and the People's Republic of China: Final Results of the Expedited Sunset Reviews of the Antidumping Duty Orders

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

DATES: Effective Date: **[INSERT DATE OF PUBLICATION IN THE FEDERAL REGISTER]**.

SUMMARY: As a result of these sunset reviews, the Department of Commerce (the Department) finds that revocation of the antidumping duty orders on chlorinated isocyanurates (chlorinated isos) from Spain and the People's Republic of China (PRC) would be likely to lead to continuation or recurrence of dumping at the rates identified in the "Final Results of Review" section of this notice.

SUPPLEMENTARY INFORMATION:

Background

The Department published the antidumping duty orders on chlorinated isos from Spain and the PRC on June 24, 2005.¹ On September 1, 2015, pursuant to section 751(c) of the Tariff Act of 1930, as amended (the Act), the Department initiated sunset reviews of the antidumping duty orders on chlorinated isos from Spain and the PRC.² On September 11, 2015, the Department received a notice of intent to participate from Clearon Corporation (Clearon), Occidental Chemical Corporation (OxyChem), and Bio-Lab, Inc. (Bio-Lab), (collectively, the petitioners), within the deadline specified in 19 CFR 351.218(d)(1)(i). Petitioners are manufacturers of a domestic like product in the United States and, accordingly, are domestic interested parties pursuant to section 771(9)(C) of the Act.

On October 1, 2015, the Department received an adequate substantive response to the notice of initiation from the domestic interested parties within the 30-day deadline specified in 19 CFR 351.218(d)(3)(i). The Department did not receive any responses from the respondent interested parties, *i.e.*, chlorinated isos producers and exporters from Spain and the PRC. On the basis of the notice of intent to participate and adequate substantive response filed by the petitioners and the inadequate response from any respondent interested party, the Department conducted expedited sunset reviews of these orders pursuant to section 751(c)(3)(B) of the Act and 19 CFR 351.218(e)(1)(ii)(C).

Scope of the Orders

The products covered by the orders are chlorinated isos, which are derivatives of cyanuric acid, described as chlorinated s-triazine triones. There are three primary chemical compositions of chlorinated isos: (1) trichloroisocyanuric acid (Cl₃(NCO)₃), (2) sodium dichloroisocyanurate

(dehydrate) $(\text{NaCl}_2(\text{NCO})_3(2\text{H}_2\text{O}))$, and (3) sodium dichloroisocyanurate (anhydrous) $(\text{NaCl}_2(\text{NCO})_3)$. The orders cover all chlorinated isos. A full description of the scope of the order is contained in the Issues and Decision Memorandum for the Expedited Sunset Reviews of the Antidumping Duty Orders on Chlorinated Isocyanurates from Spain and the People's Republic of China.

Analysis of Comments Received

The issues discussed in the Decision Memorandum³ are the likelihood of continuation or recurrence of dumping, and the magnitude of the margins of dumping likely to prevail if these orders were revoked. Parties can find a complete discussion of all issues raised in this review and the corresponding recommendations in the Decision Memorandum which is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <http://access.trade.gov> and is available to all parties in the Central Records Unit in room B8024 of the main Commerce building. In addition, a complete version of the Decision Memorandum can be accessed directly on the Internet at <http://trade.gov/enforcement/>. The signed Decision Memorandum and electronic versions of the Decision Memorandum are identical in content.

Final Results of Review

Pursuant to sections 752(c)(1) and (3) of the Act, we determine that revocation of the antidumping orders of chlorinated isos from Spain and the PRC would be likely to lead to continuation or recurrence of dumping. Further, we determine that the magnitudes of the margins of dumping likely to prevail are as follows:
