NEEDS AND USES: The information collection requirement is necessary to obtain and retain flying experience, qualifications and training data of each aviator, crew member, Unmanned Aircraft System (UAS) operator, flight surgeon and aeromedical physician assistants in aviation service; and to monitor and manage individual contractor flight and ground personnel records. Leadership uses CAFRS to determine proficiency of Air Traffic Controllers and Air Traffic Control Maintenance Technicians and the reliability of the Air Traffic Control system operations within the Department of the Army. CAFRS is a decision support system for automated mission planning, risk assessment and risk mitigation that supports Mission Command functions within Aviation units. CAFRS supports the Aviation Commander's decision making process required to complete the Aviation Risk Assessment Worksheet (RAW) that provides the assessment tools to match personnel qualifications, operations tempo to aircraft type, and mission needs. The CAFRS application, a sub-system of the Aviation Mission Planning System (AMPS), provides aircrew member flight hours, aircraft currency, qualification and training history in order to accomplish effective risk assessment/risk mitigation throughout the Aviation Mission Planning Process.
