Abstract: The New Source Performance Standards (NSPS) apply to each affected facility at any grain terminal elevator or any grain storage elevator. The facilities are each truck unloading station, truck loading station, barge and ship loading station, railcar loading station, railcar unloading station, grain dryer and all grain handling operations that commenced construction, modification or reconstruction after August 3, 1978. Owners or operators of the affected facilities must make a one-time-only report of the date of construction or reconstruction, notification of the actual date of startup, notification of any physical or operational change to existing facility that may increase the rate of emission of the regulated pollutant, notification of initial performance test; and results of initial performance test. Owners or operators are also

required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction, or any period during which the monitoring system is inoperative.

Form Numbers: None.

Respondents/affected entities: Grain elevator operations.

Respondent's obligation to respond: Mandatory (40 CFR Part 60, Subpart DD).

Estimated number of respondents: 200 (total).

Frequency of response: Initially.

Total estimated burden: 460 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$46,000 (per year). There are no annualized capital/startup or O&M costs.

Changes in the Estimates: There is a decrease in the respondent and Agency burden in this ICR compared to the previous ICR. This is not due to program changes. The burden and cost decrease because we corrected the burden estimates by removing the annual summary report line item to more accurately reflect the Subpart DD regulatory requirements. The current Subpart DD NSPS does not impose any ongoing monitoring or reporting requirement.
