Under the Magnuson-Stevens Fishery Conservation and Management Act, the Secretary of Commerce (Secretary) has the responsibility for the conservation and management of marine fishery resources. Much of this responsibility has been delegated to the National Oceanic and Atmospheric Administration (NOAA)/National Marine Fisheries Service (NMFS). Under this stewardship role, the Secretary was given certain regulatory authorities to ensure the most beneficial uses of these resources. One of the regulatory steps taken to carry out the conservation and management objectives is to collect data from users of the resource. Thus, as regional Fishery Management Councils develop specific Fishery Management Plans (FMP), the Secretary has promulgated rules for the issuance and use of a vessel Interactive Voice Response (IVR) system, a Vessel Monitoring System (VMS) and vessel logbooks (VTR) to obtain fishery-dependent data to monitor, evaluate, and enforce fishery regulations.

Fishing vessels permitted to participate in Federally-permitted fisheries in the Northeast are required to submit logbooks containing catch and effort information about their fishing trips. Participants in the herring, tilefish and red crab fisheries are also required to make weekly reports on their catch through IVR. In addition, vessels fishing under a days-at sea (DAS) management system can use the IVR system to request a DAS credit when they have canceled a trip for unforeseen circumstances. The information submitted is needed for the management of the fisheries.

*Affected Public:* Business or other for-profit organizations.

*Frequency:* Weekly, monthly and on occasion.

*Respondent's Obligation:* Mandatory.
