The National Marine Fisheries Service (NMFS) manages fishing activities in the Rose

Atoll Marine, Marianas Trench, and Pacific Remote Islands Marine National Monuments. Regulations at 50 CFR Part 665 require the owner and operator of a vessel used to non-commercially fish for, take, retain, or possess any management unit species in these monuments to hold a valid permit.

Regulations also require the owner and operator of a vessel that is chartered to fish recreationally for, take, retain, or possess, any management unit species in these monuments to hold a valid permit. The fishing vessel must be registered to the permit. The charter business must be established legally in the permit area where it will operate. Charter vessel clients are not required to have a permit.

The permit application collects basic information about the permit applicant, type of operation, vessel, and permit area. NMFS uses this information to determine permit eligibility. The information is important for understanding the nature of the fishery and provides a link to participants. It also aids in the enforcement of Fishery Ecosystem Plan measures.

Regulations also require the vessel operator to report a complete record of catch, effort, and other data on a NMFS logsheet. The vessel operator must record all requested information on the logsheet within 24 hours of the completion of each fishing day. The vessel operator also must sign, date, and submit the form to NMFS within 30 days of the end of each fishing trip.

Affected Public: Business or other for-profit organizations.

Frequency: Annually and on occasion.

Respondent's Obligation: Required to obtain or retain benefits.
