##### **SUPPLEMENTARY INFORMATION:**

###### **I. Abstract**

This request is for a revision and extension of a currently approved information collection.

Collection of estuary habitat restoration project information (e.g., location, habitat type, goals, status, monitoring information) will be undertaken in order to populate a restoration project database mandated by the Estuary Restoration Act of 2000. The database is intended to provide information to improve restoration methods, provide the basis for required reports to Congress, and track estuary habitat acreage restored. Estuary habitat restoration project information will be submitted by habitat restoration project managers and will be accessible to the public via Internet for data queries and project reports.

The collection method has been revised to only include paper or electronic forms instead of web-based data entry forms, as maintaining the web-based data entry option is not cost-effective.

## **II. Method of Collection**
