CAFTA-DR parties otherwise agree, requires it to meet annually to oversee
the implementation of, and review progress under, Chapter 17. Article 17.5
further requires, unless the parties otherwise agree, that each meeting of the
Council include a session in which members of the Council have an
opportunity to meet with the public to discuss matters relating to the
implementation of Chapter 17.

In Article 17.9, the parties recognize the importance of strengthening capacity to protect the environment and to promote sustainable development in concert with strengthening trade and investment relations and state their commitment to expanding their cooperative relationship on environmental matters. Article 17.9 also references the ECA, which sets out certain priority areas of cooperation on environmental activities. These priority areas include, among others: reinforcing institutional and legal frameworks and the capacity to develop, implement, administer, and enforce environmental laws, regulations, standards and policies; conserving and managing shared, migratory and endangered species in international commercial trade and management of protected areas; promoting best practices leading to sustainable management of the environment; and facilitating technology development and transfer and training to promote clean production technologies. In preparing comments, we encourage submitters to refer to:
