### **I. Abstract**

This request is for a new collection of information.

The Southwest Fisheries Science Center (SWFSC) is undertaking an economics data collection effort for the West Coast Coastal Pelagic Species (CPS) fleet to improve the SWFSC's capability to do the following: (1) describe and monitor economic performance (e.g., profitability, capacity utilization, efficiency, and productivity) and impacts (e.g., sector, community, or region-specific employment and income); (2) determine the quantity and distribution of net benefits derived from living marine resources; (3) understand and predict the ecological, and behavior of participants in Federally managed commercial fisheries; (4) predict the biological, ecological, and economic impacts of existing management measures and alternative proposed management actions; and, (4) in general, more effectively conduct the analyses required under the MSA, the Endangered Species ACT (ESA), and the Marine Mammal Protection Act (MMPDA), the National Environmental Policy Act( NEP) , and Regulatory Flexibility Act (RFA), Executive Order 12866, and other applicable law.

CPS fishery participants are defined as US west-coast purse seine vessels participating in the coastal pelagic species (CPS) fisheries -- northern anchovy, Pacific mackerel, Pacific sardine, and/or market squid), we intend to survey all Washington-Oregon-California coastal purse seine vessels with sardine landings in any year between 2015 and the initiation of the survey. This includes vessels fishing off California in the limited entry program under the CPS Fishery Management Plan (FMP) and State permitted vessels fishing off Washington and Oregon.

## **II. Method of Collection**

CPS fishery participants will be contacted and screened to participate in the data collection. A cost and earnings survey will be scheduled and administered to eligible respondents as appropriate. Screener, scheduling and survey modes may include in-person, internet, phone, or mail.
