The Commission has determined that the authorized resale of international private lines interconnected to the U.S. public switched network would tend to divert international message telephone service (IMTS) traffic from the settlements process and increase the U.S. net

settlements deficit. The information will be used by the Commission in reviewing the impact, if any, that end-user private line interconnections have on the Commission's international settlements policy. The data will also enhance the ability of both the Commission and interested parties to monitor the unauthorized resale of international private lines that are interconnected to the U.S. public switched network.

FEDERAL COMMUNICATIONS COMMISSION.

Federal Register Liaison Officer.

Office of the Secretary.
