Section 47 CFR 43.82 of the Commission's rules requires that each common carrier engaged in providing facilities-based international telecommunications services between the United States and foreign points shall file annually the status of its circuits used to provide international services. The annual circuit-status report, required by Section 43.82, provides the Commission, the carriers, and others information on how U.S. international carriers use their circuits. The Commission uses the information from the circuit-status reports to ensure that carriers with market power do not use their access to circuit capacity to engage in any anti-competitive behavior. The Commission also uses the reports to implement the requirement in Section 9 of the Communications Act of 1934, as amended, that carriers pay annual regulatory fees for each of the bearer circuits they own.

Federal Communications Commission.
