SUMMARY OF COLLECTION: The primary function of the National Agricultural Statistics Service (NASS) is to prepare and issue current official state and national estimates of crop and livestock production. Information is collected on a voluntary basis from growers, processors, and handlers through surveys.

NEED AND USE OF THE INFORMATION: Data reported on fruit, nut, specialty crops and Hawaii tropical crops are used by NASS to estimate acreage, yield, production, price, utilization, and value of citrus and non-citrus fruits and nuts and other specialty crops in States with significant commercial production. These estimates are essential to farmers, processors, and handlers in making production and marketing decisions. Estimates from these inquiries are used by market order administrators in their determination of expected supplies of crop under federal and state market orders as well as competitive fruits and nuts.
