**SUPPLEMENTARY INFORMATION:** The AC21 has been established to provide information and advice to the Secretary of Agriculture on the broad array of issues related to the expanding dimensions and importance of agricultural biotechnology. The committee is charged with examining the long-term impacts of biotechnology on the U.S. food and agriculture system and USDA, and providing guidance to USDA on pressing individual issues, identified by the Office of the Secretary, related to the application of biotechnology in agriculture. In recent years, the work of the AC21 has centered on the issue of coexistence among different types of agricultural production systems. The AC21 consists of members representing the biotechnology industry, the organic food industry, farming communities, the seed industry, food manufacturers, state government, consumer and community development groups, as well as academic researchers and a medical doctor. In addition, representatives from the Department of Commerce, the Department of Health and Human Services, the Environmental Protection Agency, the Council on

Environmental Quality, and the Office of the United States Trade Representative serve as “ex officio” members.

In its last report, issued on November 17, 2012, entitled “Enhancing Coexistence: A Report to the Secretary of Agriculture,” and available on the website listed below, the AC21 offered a diverse package of recommendations, among which was a recommendation that “...USDA should facilitate development of joint coexistence plans by neighboring farmers,” and that in a pilot program, USDA should, among other things, offer incentives for the development of such plans.

At its meeting on December 14-15, 2015, USDA offered a specific new charge to the AC21 building on its previous work. Recognizing that USDA currently lacks the legal authority to offer any such incentives, the committee has been charged with considering the following two questions: Is there an approach by which farmers could be encouraged to work with their neighbors to develop joint coexistence plans at the State or local level? If so, how might the Federal government assist in that process?

At the AC21’s two most recent meetings, on March 14-15, 2016 and June 13-14, 2016, AC21 members reached a general agreement on the main elements of the upcoming report and made substantial progress in defining the content of its next report. The report is to include, among other things, a model for convening coexistence discussions at the local level as well as guidance for farmers around the production of identity-preserved crops. The objective for this meeting is to complete all substantive work on the report to USDA.

Background information regarding the work and membership of the AC21 is available on the USDA web site at

<http://www.usda.gov/wps/portal/usda/usdahome?contentid=AC21Main.xml&contentidonly=true>. A copy of the draft AC21 report under consideration will be made available on that web site at least 10 days prior to the meeting.
