**SUPPLEMENTARY INFORMATION:**

**I. Abstract.** The programmatic clearance applies to social science surveys, interviews, and focus groups designed to provide information to Service managers and practitioners to improve quality and utility of agency programs, services, and planning efforts. Data from collections undertaken through the proposed programmatic clearance would provide information for agency management, planning, and monitoring and evaluating the National Wildlife Refuge System (Refuge System) efforts generally and the Urban Wildlife Conservation Program specifically, as well as efforts of other Service programs. To ensure continuous improvement, Service activities and projects require ongoing systematic assessment of their design, implementation, and outcomes. The scope of this programmatic clearance includes individual surveys, focus groups, and interviews of refuge visitors, potential visitors, and residents of communities near Service-managed units, and stakeholders and partners, including tribal interests. We estimate that we will receive 20,333 responses to surveys at 20 minutes per survey; 833 responses to telephone surveys at 25 minutes per survey; 784 nonresponses at 5 minutes per survey; and 59 responses from focus groups at 1 hour per focus group annually.

Questions asked under the programmatic clearance must show a clear tie to Service management needs. The programmatic review may only be used for

noncontroversial information collections that are unlikely to attract or include topics of significant public interest. OMB must approve all collections before we can collect the information.
