Certain Coated Paper Suitable for High-Quality Print Graphics Using Sheet-Fed Presses from Indonesia and the People's Republic of China: Continuation of Antidumping and Countervailing Duty Orders

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce

SUMMARY: As a result of the determinations by the Department of Commerce (the Department) and the International Trade Commission (ITC) that revocation of the antidumping duty (AD) and countervailing duty (CVD) orders on certain coated paper suitable for high-quality print graphics using sheet-fed presses (coated paper) from Indonesia and the People's Republic of China (PRC) would be likely to lead to continuation or recurrence of dumping and countervailable subsidies and material injury to an industry in the United States, the Department is publishing a notice of continuation of the AD and CVD orders.

DATES: Effective [INSERT DATE OF PUBLICATION IN THE *FEDERAL REGISTER*].

## SUPPLEMENTARY INFORMATION:

### Background

On October 1, 2015, the Department initiated<sup>1</sup> and the ITC instituted<sup>2</sup> five-year (sunset) reviews of the AD and CVD orders on coated paper from Indonesia and the PRC, pursuant to section 751(c) of the Tariff Act of 1930, as amended (the Act). As a result of its reviews, the Department determined that revocation of the AD orders on coated paper from Indonesia and the PRC would likely lead to continuation or recurrence of dumping,<sup>3</sup> and that revocation of the CVD orders would likely lead to continuation or recurrence of countervailable subsidies.<sup>4</sup> The Department, therefore, notified the ITC of the magnitude of the margins of dumping and net countervailable subsidy rates likely to prevail were the AD and CVD orders revoked.<sup>5</sup>

On December 29, 2016, the ITC published its determinations, pursuant to sections 751(c) and 752 of the Act, that revocation of the AD and CVD orders on coated paper from Indonesia and the PRC would likely lead to continuation or recurrence of material injury to an industry in the United States within a reasonably foreseeable time.<sup>6</sup>

## Scope of the Orders

The scope of the orders cover certain coated paper and paperboard<sup>7</sup> in sheets suitable for high quality print graphics using sheet-fed presses; coated on one or both sides with kaolin (China or other clay), calcium carbonate, titanium dioxide, and/or other inorganic substances; with or without a binder; having a GE brightness level of 80 or higher,<sup>8</sup> weighing not more than 340 grams per square meter; whether gloss grade, satin grade, matte grade, dull grade, or any other grade of finish; whether or not surface-colored, surface-decorated, printed (except as described below), embossed, or perforated; and irrespective of dimensions (Certain Coated Paper).

Certain Coated Paper includes (a) coated free sheet paper and paperboard that meets this scope definition; (b) coated groundwood paper and paperboard produced from bleached chemi-thermo- mechanical pulp (BCTMP) that meets this scope definition; and (c) any other coated paper and paperboard that meets this scope definition.

Certain Coated Paper is typically (but not exclusively) used for printing multi-colored graphics for catalogues, books, magazines, envelopes, labels and wraps, greeting cards, and other commercial printing applications requiring high quality print graphics.

Specifically excluded from the scope are imports of paper and paperboard printed with final content printed text or graphics.

Imports of the subject merchandise are provided for under the following categories of the

<sup>7</sup> “‘Paperboard’ refers to Certain Coated Paper that is heavier, thicker and more rigid than coated paper which otherwise meets the product description. In the context of Certain Coated Paper, paperboard typically is referred to as ‘cover,’ to distinguish it from ‘text.’”

<sup>8</sup> One of the key measurements of any grade of paper is brightness. Generally speaking, the brighter the paper the better the contrast between the paper and the ink. Brightness is measured using a GE Reflectance Scale, which measures the reflection of light off of a grade of paper. One is the lowest reflection, or what would be given to a totally black grade, and 100 is the brightest measured grade.

While HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope of these orders is dispositive.

#### Continuation of the Orders

As a result of the determinations by the Department and the ITC that revocation of the AD and CVD orders would likely lead to a continuation or a recurrence of dumping and countervailable subsidies and material injury to an industry in the United States, pursuant to section 751(d)(2) of the Act and 19 CFR 351.218(a), the Department hereby orders the continuation of the AD and CVD orders on coated paper from Indonesia and the PRC. U.S. Customs and Border Protection (CBP) will continue to collect AD and CVD cash deposits at the rates in effect at the time of entry for all imports of subject merchandise.

The effective date of the continuation of the orders will be the date of publication in the *Federal Register* of this notice of continuation. Pursuant to section 751(c)(2) of the Act, the Department intends to initiate the next five-year review of these orders not later than 30 days prior to the fifth anniversary of the effective date of continuation.

#### Administrative Protective Order

This notice also serves as the only reminder to parties subject to administrative protective order (APO) of their responsibility concerning the return/destruction or conversion to judicial protective order of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Failure to comply is a violation of the APO which may be subject to sanctions.

These five-year (sunset) reviews and notice are in accordance with sections 751(c) and published pursuant to section 777(i) the Act and 19 CFR 351.218(f)(4).
