**SUPPLEMENTARY INFORMATION:**

**Background:** This is the third public hearing the Commission will hold during its 2017 report cycle to collect input from academic, industry, and government experts on national security implications of the U.S. bilateral trade and economic relationship with China. This hearing on “China’s Pursuit of Next Frontier Tech: Computing, Robotics, and Biotechnology” will examine the industrial policies outlined in the 13th Five-Year Plan (2016–2020) and related policy announcements that seek to move Chinese manufacturing up the value-added chain, establish China as a global center of innovation and technology, and ensure China’s long-term productivity in critical dual-use technologies such as computing, robotics, and biotechnology. Advancements in these sectors have previously driven U.S. technological and military superiority, and the Chinese government is looking to develop its own technological leaders and reduce its dependence on foreign technology. This hearing will examine what steps the Chinese government has taken to support these sectors, compare U.S. and Chinese technological leadership in these sectors, and consider the implications of China’s policies for U.S.

economic and national security interests and how the United States can maintain its strategic advantage. The hearing will be co-chaired by Commissioner Daniel M. Slane and Commissioner Katherine C. Tobin, Ph.D. Any interested party may file a written statement by March 16, 2017, by mailing to the contact information above. A portion of each panel will include a question and answer period between the Commissioners and the witnesses.
