Merchant Hydro Developers, LLC;

Notice of Preliminary Permit Application Accepted for Filing And Soliciting Comments,
Motions to Intervene, and Competing Applications

On December 19, 2016, Merchant Hydro Developers, LLC, filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of the Panther Pumped Storage Hydroelectric Project to be located near the town of Simpson in Lackawanna and Wayne Counties, Pennsylvania. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project would consist of the following: (1) a new upper reservoir with a surface area of 175 acres and a storage capacity of 2,625 acre-feet at a surface elevation of approximately 1,960 feet above mean sea level (msl) created through construction of new roller-compacted concrete or rock-filled dams and/or dikes; (2) excavating a new lower reservoir with a surface area of 180 acres and a total storage capacity of 4,500 acre-feet at a surface elevation of 1,325 feet msl; (3) a new 6,045-foot-long, 48-inch-diameter penstock connecting the upper and lower reservoirs; (5) a new 150-foot-long, 50-foot-wide powerhouse containing two turbine-generator units with a total rated capacity of 172 megawatts; (6) a new transmission line connecting the powerhouse to a nearby electric grid interconnection point with options to evaluate multiple grid interconnection locations; and (7) appurtenant facilities. Possible initial fill water and make-up water would come from the Lackawanna River. The proposed project would have an annual generation of 502,717 megawatt-hours.
