[Project No. 14834-000]

Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments,
Motions to Intervene, and Competing Applications

On January 18, 2017, Merchant Hydro Developers, LLC, filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of the Stony Creek Pumped Storage Hydro Project to be located near the town of Somerset in Somerset County, Pennsylvania. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project would consist of the following: (1) a new upper reservoir having a surface area of 100 acres and a storage capacity of 1,500 acre-feet at a surface elevation of approximately 2,540 feet above mean sea level (msl) created through construction of new roller-compacted concrete or rock-filled dams; (2) a new lower reservoir having a surface area of 40 acres and a storage capacity of 1,800 acre-feet at a surface elevation of approximately 1,800 feet msl created through construction of new roller-compacted concrete or rock-filled dams; (3) a new 2,560-foot-long, 48-inch-diameter penstock connecting the upper and lower reservoirs; (4) a new 150-foot-long, 50-foot-wide powerhouse containing two turbine-generator units with a total rated capacity of 91 megawatts; (5) a new transmission line connecting the powerhouse to a nearby electric grid interconnection point with options to evaluate multiple grid interconnection locations; and (6) appurtenant facilities. Possible initial fill water and make-up water would come from Stony Creek Lake. The proposed project would have an annual generation of 332,152 megawatt-hours.
