Under part 235 of Title 49 of the Code of Federal Regulations (CFR) and 49 U.S.C. 20502(a), this document provides the public notice that on April 20, 2017, Union Pacific Railroad (UP) petitioned the Federal Railroad Administration (FRA) seeking approval to discontinue or modify a signal system. UP seeks to retire the power crossover connecting to the Alton Industrial Lead and the power switch connecting to the Wood River Yard at control point X262 on the Springfield Subdivision in Alton, IL. Both mainline switch machines will be replaced with electric locks. The power crossover connecting the two mainline signals will

remain. The signals governing movement into and out of the yard and industrial lead will be retired, and the mainline signals upgraded to current standards and aspect progressions. The purpose of this retirement is to facilitate switching operations in the yard and industrial lead and increase mainline velocity.
