Project No. 14830-000

NOTICE OF PRELIMINARY PERMIT APPLICATION ACCEPTED FOR FILING
AND SOLICITING COMMENTS, MOTIONS TO INTERVENE, AND COMPETING
APPLICATIONS

On January 18, 2017, Merchant Hydro Developers, LLC, filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of the Moresville Energy Pumped Storage Hydroelectric Project to be located in Delaware County, New York. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project would consist of the following: (1) a new upper reservoir with a surface area of 40 acres and a storage capacity of 600 acre-feet at a surface elevation of approximately 2,850 feet above mean sea level (msl) created through construction of a new roller-compacted concrete or rock-filled dam and/or dike; (2) excavating a new lower reservoir with a surface area of 30 acres and a total storage capacity of 720 acre-feet at a surface elevation of 1,860 feet msl; (3) a new 4,660-foot-long, 48-inch-diameter penstock connecting the upper and lower reservoirs; (4) a new 150-foot-long, 50-foot-wide powerhouse containing two turbine-generator units with a total rated capacity of 49 megawatts; (5) a new transmission line connecting the powerhouse to a nearby 115-kilovolt electric grid interconnection point; and (6) appurtenant facilities. Possible initial fill water and make-up water would come from the nearby East Branch of the Delaware River, including groundwater. The proposed project would have an annual generation of 177,746 megawatt-hours.
