Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments,  
Motions to Intervene, and Competing Applications; Merchant Hydro Developers, LLC

On January 18, 2017, Merchant Hydro Developers, LLC, filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of the Snoosh Mountain Pumped Storage Hydroelectric Project to be located in Somerset County, Pennsylvania. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project would consist of the following: (1) a new upper reservoir with a surface area of 66 acres and a storage capacity of 990 acre-feet at a surface elevation of approximately 2,670 feet above mean sea level (msl) created through construction of a new roller-compacted concrete or rock-filled dam and/or dike; (2) excavating a new lower reservoir with a surface area of 60 acres and a total storage capacity of 1,188 acre-feet at a surface elevation of 1,850 feet msl; (3) a new 2,670-foot-long, 48-inch-diameter penstock connecting the upper and lower reservoirs; (4) a new 150-foot-long, 50-foot-wide powerhouse containing two turbine-generator units with a total rated capacity of 67 megawatts; (5) a new transmission line connecting the powerhouse to a nearby 115-kilovolt electric grid interconnection point; and (6) appurtenant facilities. Possible initial fill water and make-up water would come from the nearby Raystown Branch of the Juniata River, including groundwater. The proposed project would have an annual generation of 242,920 megawatt-hours.
