II. Discussion

On October 17, 2017 (82 FR 48283), the NRC requested public comment on the draft regulatory analysis, "Draft Regulatory Analysis for Final Rule: Low-Level Radioactive Waste Disposal." The purpose of the draft regulatory analysis is to support development of the new supplemental proposed rule as directed by the Commission in the staff requirements memorandum to SECY-16-0106 (ADAMS Accession No. ML17251B147), dated September 8, 2017. The NRC staff is seeking comment on how to improve the approach/methodology and actual cost data currently used in the draft final rule regulatory analysis (ADAMS Accession No. ML16189A050) to provide more accurate cost and benefit data in the final regulatory analysis.

The NRC received several requests from public stakeholders to extend the comment period for the draft regulatory analysis. Public stakeholders noted in their requests that more time is needed to allow for the gathering of actual cost data. The comment period is being reopened and now closes on December 18, 2017.

Dated at Rockville, Maryland, this 17th day of November, 2017.

For the Nuclear Regulatory Commission.

Patricia Holahan,
Director,
Division of Rulemaking,
