ENVIRONMENTAL PROTECTION AGENCY

[EPA-R05-OAR-2017-0277; FRL-9971-62-Region 5]

Adequacy Status of the Metro-East St. Louis, Illinois 2008 Ozone Standard Nonattainment Area for the Submitted Maintenance Plan for Transportation Conformity Purposes

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of finding of adequacy.

SUMMARY: In this notice, the Environmental Protection Agency (EPA) is notifying the public that we find the motor vehicle emissions budgets (MVEBs) for volatile organic compounds (VOCs) and oxides of nitrogen (NO_x) in the Illinois portion of the St. Louis area (Madison, Monroe and St. Clair Counties or "Metro-East area"), 2008 Ozone Standard nonattainment area adequate for use in transportation conformity determinations. Illinois submitted a 2008 Ozone Standard maintenance plan for the Metro-East area on May 8, 2017. As a result of this finding of adequacy, the MVEBs from the submitted maintenance plan must be used by state and Federal agencies in determining whether proposed transportation projects conform to the SIP as required by the Clean Air Act.

DATES: This finding is applicable **[INSERT DATE 15 DAYS AFTER DATE OF PUBLICATION IN THE FEDERAL REGISTER]**.

FOR FURTHER INFORMATION CONTACT:

Michael Leslie, Environmental Engineer, Control Strategies
Section (AR-18J), Air Programs Branch, Air and Radiation
Division, United States Environmental Protection Agency, Region
5, 77 West Jackson Boulevard, Chicago, Illinois 60604, (312)
353-6680, leslie.michael@epa.gov.

SUPPLEMENTARY INFORMATION:

Throughout this document, whenever "we", "us" or "our" is used,
we mean EPA.

Background:

Today's notice is an announcement of a finding that we have
already made. On September 26, 2017, EPA sent a letter to the
Illinois Environmental Protection Agency, stating that the 2030
MVEBs contained in the maintenance plan for the 2008 Ozone
Standard for Metro-East area are adequate for transportation
conformity purposes. EPA announced receipt of these MVEBs on
its transportation conformity website, and did not receive any
comments during the public comment period. The finding of
adequacy is available at EPA's conformity web site:

[https://www.epa.gov/state-and-local-transportation/adequacy-
review-state-implementation-plan-sip-submissions-conformity.](https://www.epa.gov/state-and-local-transportation/adequacy-review-state-implementation-plan-sip-submissions-conformity)

The 2030 MVEBs, in tons per day (tpd), for VOCs and NO_x for the Metro-East St. Louis, Illinois area are as follows:

Year	NO_x (tpd)	VOCs (tpd)
2030	16.68	9.05

Transportation conformity is required by section 176(c) of the Clean Air Act. EPA's conformity rule requires that transportation plans, programs, and projects conform to state air quality implementation plans and establishes the criteria and procedures for determining whether they conform. Conformity to a State Implementation Plan (SIP) means that transportation activities will not produce new air quality violations, worsen existing violations, or delay timely attainment of the national ambient air quality standards.

The criteria by which we determine whether a SIP's MVEBs are adequate for transportation conformity purposes are outlined in 40 CFR 93.118(e)(4). Please note that an adequacy review is separate from EPA's completeness review, and is also a separate action from EPA's evaluation of and decision whether to approve a proposed SIP revision.

Authority: 42 U.S.C. 7401-7671q.

Dated: November 17, 2017.

Robert A. Kaplan,

Acting Regional Administrator, Region 5.
