*Abstract:* Owners and operators of affected facilities are required to comply with reporting and record keeping requirements for the General Provisions (40 CFR Part 60, Subpart A), as well as the specific requirements at 40 CFR Part 60, Subpart Da. This includes submitting initial notifications, performance tests and periodic reports and results, and maintaining records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These reports are used by EPA to determine compliance with the standards.

*Form Numbers:* None.

*Respondents/affected entities:* Electric utility steam generating facilities.

*Respondent's obligation to respond:* Mandatory (40 CFR Part 63, Subpart Da).

*Estimated number of respondents:* 743 (total).

*Frequency of response:* Initially, quarterly and semiannually.

*Total estimated burden:* 177,000 hours (per year). Burden is defined at 5 CFR 1320.3(b).

*Total estimated cost:* \$31,900,000 (per year), includes \$13,300,000 for both annualized capital operation & maintenance costs.

*Changes in the Estimates:* There is an adjustment increase in the respondent burden, labor costs, and capital/O&M cost from the most- recently approved ICR. This increase is not due to any program changes. The change in burden and costs is due to an increase in the number of sources. This ICR assumes an industry growth rate of 11 respondents per year, which results in an increase of 33 respondents since the last ICR renewal period. The industry growth also results in an increase in O&M costs.
