**I. Abstract**

The NIST Center for Neutron Research (NCNR) Information Management System (IMS) is a public facing, web-based application to collect, manage and report operational data related to NCNR's role as a unique national user facility which was chartered to serve the nation's scientific community by providing unique experimental apparatus for scientific studies using neutron scattering. In order to fulfill that mission, NCNR established a complex business process to fairly distribute available scientific resources to prospective external users, outlined by the following steps:

- Registration of NCNR users
- Collection of scientific experiment proposals
- Regularly scheduled peer review of said proposals
- Merit-based award of available experimental resources
- Experiment date scheduling for selected projects (instrument scheduling)
- Collection and management of data required by the NCNR site access protocol

- Managing the Health Physics training of arriving scientists
- Coordination of administrative data
- Collection of data in support of related activities such as NCNR Summer School for facility users
- Management of the research results such as collected data, and subsequent publications
- Numerous reporting functions used to evaluate and manage the NCNR activities
