in which the Commission permits certain qualifying professional theaters, music, and performing arts organizations to obtain a part 74 license that would allow them as licensees to obtain such interference protection in the TV bands and, when needed, also to operate in other spectrum bands available for licensed wireless microphone operations under part 74. In addition, with respect to licensed wireless microphone operations in other frequency bands, revisions to the channelization plan for licensed wireless microphone operations in the 169-172 MHz band, generally affirm but provide clarifications regarding the 30-megahertz limit placed on licensed wireless microphone users' access to spectrum in the 1435-1525 MHz band, and clarify coordination requirements and operational limitations for licensed wireless microphone operations in the 941.5-944 MHz band. With these various revisions and clarifications, the Commission finalized the technical rules for wireless microphone operations and, the Commission promotes our goal of accommodating wireless microphone users' needs through access to spectrum resources following the incentive auction and reconfiguration of the TV bands.

FEDERAL COMMUNICATIONS COMMISSION.
