*ESA-Listed Species Covered in This Notice*

Chinook salmon (*Oncorhynchus tshawytscha*): threatened, naturally and artificially propagated Snake River fall-run.

*Background*

Section 9 of the ESA and Federal regulations prohibit the "taking" of a species listed as endangered or threatened. The term "take" is defined under the ESA to mean harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct. NMFS may issue permits to take listed species for any act otherwise prohibited by

section 9 for scientific purposes or to enhance the propagation or survival of the affected species, under section 10(a)(1)(A) of the ESA. NMFS regulations governing permits for threatened and endangered species are promulgated at 50 CFR 222.307.

The co-managers and funding agencies, including the NPT, WDFW, ODFW, IDFG, LSRCP, IPC, and BPA, have submitted to NMFS applications for two permits, pursuant to section 10(a)(1)(A) of the Endangered Species Act, for hatchery activities in the Snake River basin. The applications are in the form of two existing HGMPs and an addendum with updates to those HGMPs.

The addendum and previously submitted HGMPs describe actions involving hatchery activities (with associated monitoring and evaluation) in the Snake River basin. The programs are intended to contribute to the survival and recovery of Snake River Fall Chinook salmon in the Snake River basin, and to responsibly enhance fishing opportunity on hatchery-origin returns.

*Authority*

This notice is provided pursuant to section 10(c) of the ESA. NMFS will evaluate each application, associated documents, and comments submitted thereon to determine whether the applications meet the requirements of section 10(a)(1)(A) of the ESA. If it is determined that the requirements are met, permits will be issued to the NPT, WDFW,

ODFW, IDFG, LSRCP, IPC, and BPA for the purpose of carrying out the hatchery

programs. NMFS will publish a record of its final action in the Federal Register.
