SUPPLEMENTARY INFORMATION:

I. Background

In the *Federal Register* of June 11, 2010 (75 FR 33311), FDA announced the availability of a guidance for industry entitled "Bioequivalence Recommendations for Specific Products" that explained the process that would be used to make product-specific guidances available to the public on FDA's website at https://www.fda.gov/Drugs/GuidanceComplianceRegulatoryInformation/Guidances/default.htm.

As described in that guidance, FDA adopted this process as a means to develop and disseminate product-specific guidances and provide a meaningful opportunity for the public to consider and comment on those guidances. Under that process, draft guidances are posted on FDA's website and announced periodically in the *Federal Register*. The public is encouraged to

submit comments on those recommendations within 60 days of their announcement in the *Federal Register*. FDA considers any comments received and either publishes final guidances or publishes revised draft guidances for comment. Guidances were last announced in the *Federal Register* on September 14, 2018.

This notice announces new or revised draft product-specific guidances that are being posted on FDA's website concurrently with FDA's new draft guidance for industry entitled "Assessing the Irritation and Sensitization Potential of Transdermal and Topical Delivery Systems for ANDAs" and FDA's revised draft guidance for industry entitled "Assessing Adhesion With Transdermal and Topical Delivery Systems for ANDAs." FDA recommends that applicants consult the relevant product-specific guidance, in conjunction with the guidances referenced above, when considering the design and conduct of studies that may be appropriate to support a topical delivery system product intended for submission in an ANDA.

These draft guidances are being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). These draft guidances, when finalized, will represent the current thinking of FDA on, among other things, the product-specific design of BE studies to support ANDAs. They do not establish any rights for any person and are not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations. This guidance is not subject to Executive Order 12866.

IV. Electronic Access

Persons with access to the internet may obtain the draft guidances at either https://www.fda.gov/Drugs/GuidanceComplianceRegulatoryInformation/Guidances/default.htm or https://www.regulations.gov.
