*Abstract:* The BIA owns, operates, and maintains 17 irrigation projects that provide a service to the end user. To properly bill for the services provided, the BIA must collect customer information to identify the individual responsible for repaying the government the costs of delivering the service; determine eligibility for waiver of fees; and determine designation of irrigable lands as assessable or non-assessable. Additional information necessary for providing the service is the location of the service delivery and the number of serviced acres. The Debt Collection Improvement Act of 1996 (DCIA) requires that certain information be collected from individuals and businesses doing business with the government. This information includes the taxpayer identification number for possible future use to recover delinquent debt. To implement the DCIA requirement to collect customer information, the BIA has included a section concerning the collection of information in its regulations governing its irrigation projects (25 CFR 171).
