*Abstract:* The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Mineral Wool Production were proposed on May 8, 1997, promulgated on June 1, 1999, and amended on July 29, 2015. These regulations apply to both new and existing mineral wool production facilities with cupolas and/or curing ovens. These standards apply to owners or operators located at a plant site that is a major source of hazardous air pollutant (HAP) emissions. This signifies that the plant has the potential to emit any single HAP at a rate of 9.07 megagrams (10 tons) or more per year or any combination of HAPs at a rate of 22.68 megagrams (25 tons) or more per year. New facilities include those that commenced construction or reconstruction after the date of proposal. This information is being collected to assure compliance with 40 CFR Part 63, Subpart DDD.

In general, all NESHAP standards require initial notification reports, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NESHAP.

*Form Numbers:* None.

*Respondents/affected entities:* Mineral wool production facilities.

*Respondent's obligation to respond:* Mandatory (40 CFR part 60, subpart DDD).

*Estimated number of respondents:* 8 (total).

*Frequency of response:* Initially, semiannually.

*Total estimated burden:* 2,130 hours (per year). Burden is defined at 5 CFR 1320.3(b).

*Total estimated cost:* \$308,000 (per year), which includes \$6,000 in annualized capital/startup and/or operation & maintenance costs.

*Changes in the Estimates:* There is no change in the burden in this ICR compared to the previous ICR, however, there is an adjustment increase in the labor costs in this ICR compared to the previous ICR. This adjustment is due to a labor rate change in the calculation of labor costs.

There are no changes to the capital and operation and maintenance costs.
