k. **Description of Request:** The applicant proposes to replace the project's two authorized 26-megawatt (MW) turbine-generator units with six 8.1-MW turbine-generator units. The proposed action would reduce the total authorized installed capacity of the project from 52.0 to 48.6 MW, and the hydraulic capacity from 33,200 to 29,658 cubic feet per second. To accommodate the change from two to six units, the applicant proposes to increase the size of the powerhouse from 214 feet long by 112 feet wide, to 133 feet long by 236 feet wide, and raise the foundation from an elevation of -20 feet to +3 feet, which it states will pose less of a construction risk. The applicant does not propose changes to any other aspects of the project.
