a. 252.246-7003, Notification of Potential Safety Issues. Contracting officers require timely notification of potential safety defects so that (1) systems and equipment likely affected by the situation can be readily identified, and (2) appropriate engineering investigation and follow-on actions can be taken to establish and mitigate risk.

b. 252.246-7005, Notice of Warranty Tracking of Serialized Items. The information provided by offerors under this provision alerts contracting officers in those cases where the

offeror is proposing to provide a warranty for an individual contract line item for which DoD has not specified a warranty in the solicitation. The warranty notice will permit the Government to recognize and utilize any warranty after contract award.

c. 252.246-7006, Warranty Tracking of Serialized Items, implements section 818 of the National Defense Authorization Act (NDAA) for Fiscal Year (FY) 2012 (Pub. L. 112-81 as amended by section 817 of the NDAA for FY 2015 (Pub. L. 113-291). The information provided by contractors allows DoD to track warranties for item unique item identification (IUID) required items in the IUID registry to obtain maximum utility of warranties provided on contracted items. The identification and enforcement of warranties is essential to the effectiveness and efficiency of DoD's material readiness. Providing visibility and accountability of warranty data associated with acquired goods, from the identification of the requirement to the expiration date of the warranted item, significantly enhances DoD's ability to take full advantage of warranties, resulting in-

- (1) Reduced costs;
- (2) Ability to recognize benefits included at no additional cost;
- (3) Ability to compare performance against Government-

specified warranties; and

(4) Identification of sufficient durations for warranties for specific goods.

d. 252.246-7008, Sources of Electronic Parts. The notification and documentation requirements are necessary to comply with statute. The contracting officer will use the information to ensure that the contractor performs the traceability of parts, additional inspection, testing, and authentication required when an electronic part is not obtained from a trusted supplier. The Government may also use this information to more actively perform acceptance.
